Hello World!
I hope you liked the first few chapters of Volume 2 of Buttobi CPU.
This is my first time scanlating a manga and at the same time I am learning to use Photoshop Elements. So I hope to get better as I go. That being said...A new character is introduced that has a speech problem...my japanese is very limited and I rely heavily on online apps to translate, so if the text is off by even a little it wont translate properly. So it wont be a good translation and I may have to just make something up, but I figure, if nobody is in a hurry to scanlate this, then what I post is good enough for now. If someone has a better translation then feel free to post the updated version.
Your Scanlator,
Zepros
